

WAVE BLADES

Sculptured Features

- Make your project unique
- Create free-flowing organic features
- Shopdrawing service
- Integrated acoustic options

Sculptured Features

Your clients are unique. They deserve unique projects. Creating a unique touch for your project traditionally required a custom joinery unit, labourious to document and expensive.

WAVE BLADES is a proprietary feature ceiling system, making contoured timber blade features affordable and easy to specify. Now you can tap into this fast growing trend in interior design.

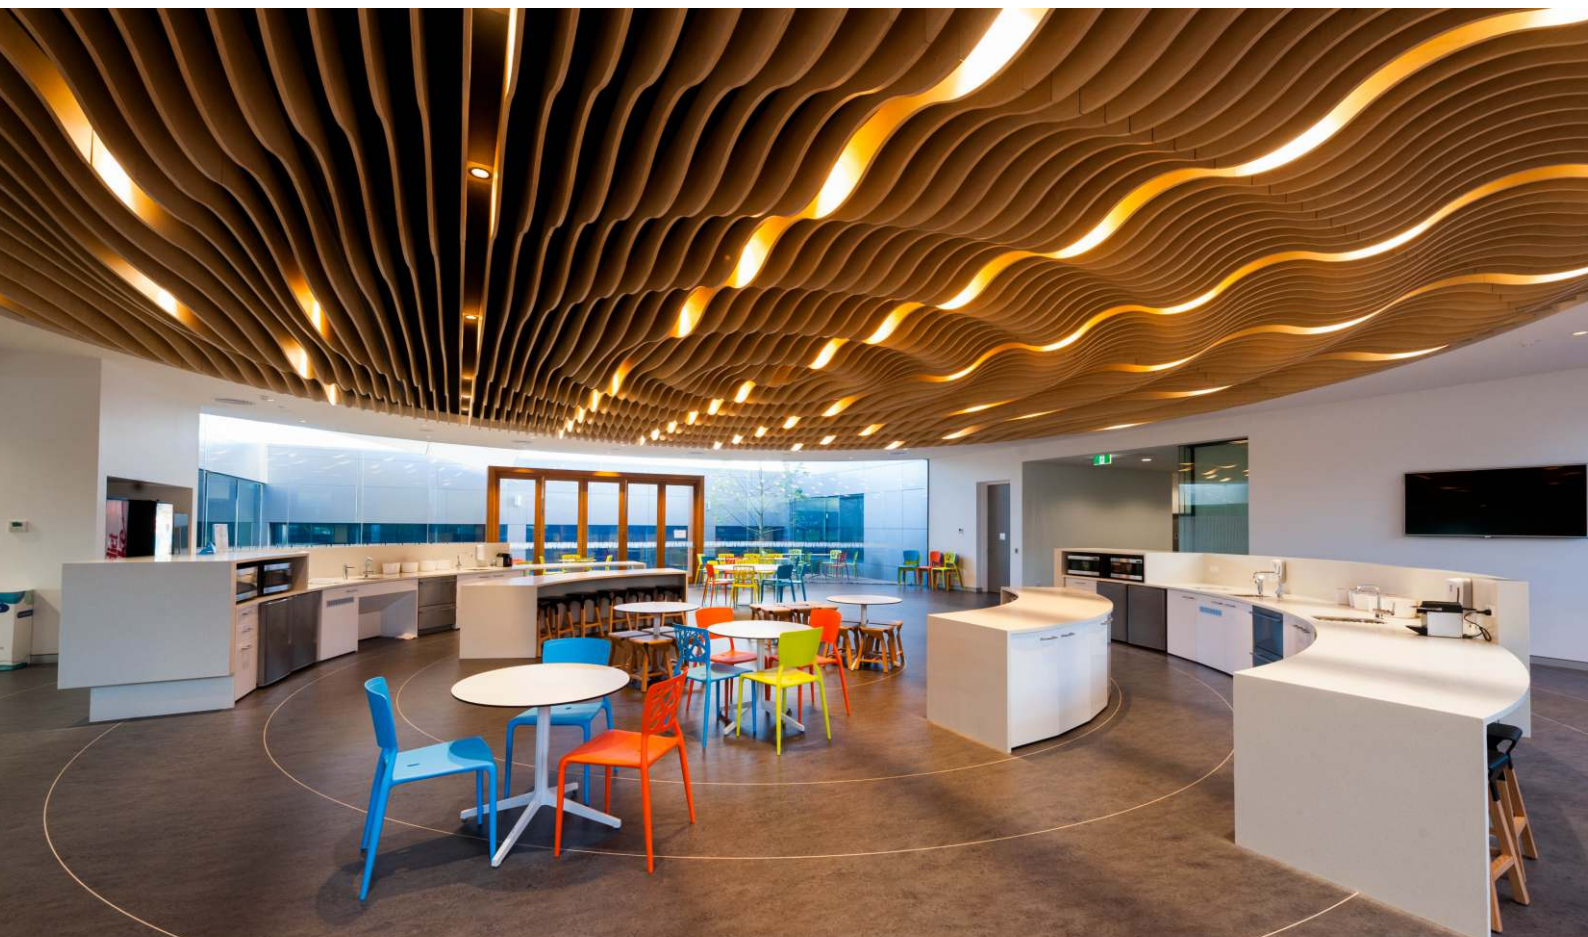

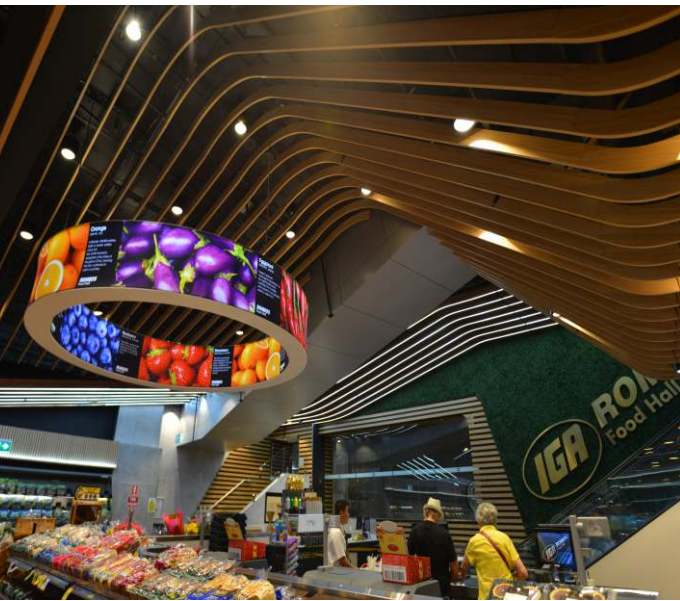

Making Design and Specifications simple...

SUPAWOOD can advise you on the best way to achieve exactly the effect you visualise. We guide you through the whole design process and then manufacture custom profile blades to exactly create your design.

Simplifying Installation...

Each blade has a concealed label identifying its unique location. Blades are delivered pre-finished and packed by area for easy installation.

WAVE BLADES have a simple fixing system suitable for any approved partition contractor which minimises installation time.
