Eye-catching, practical and cost-effective feature ceilings

Custom 3D ceiling effects are incredibly eye-catching feature elements but designing and installing them can be complex. And the cost can be wildly unpredictable.

Not anymore.

Introducing SUPATILE 3D

SUPATILE 3D is the new, fully customisable range of ceiling tiling that vastly expands your design options while simplifying installation and eliminating the potential for cost over-runs.

Eye-catching

Design unique 3D feature ceilings.

Versatile

Apply multiple finishes and acoustic damping.

Customisable

Apply any depth and any colour.

Practical

Will fit the standard (or an existing) ceiling grid.

Cost-effective

Combine with SUPATILE DIT to achieve under $300/m^2.

Create just about any effect

With SUPATILE 3D, it's easy to create an enormous range of visual effects using white, black, clear anodised or coloured grids.

Moreover, you can combine SUPATILE 3D with other members of the SUPATILE range such as SUPATILE SLAT and SUPATILE DIT. And, SUPATILE 3D doesn't compromise accessibility into the ceiling cavity.

Panel sizes

- Nominally 600mm x 600mm
- Customisable depth up to 180mm

Special substrate options

- Acoustic perforations
- Fire retardant
- Green Star

CAD Models

SUPAWOOD have 3D AutoCAD DWG files of all standard SUPATILE 3D shapes which you can import into your drawing software to enable you to quickly include SUPATILE 3D in your designs and client submissions.
